Bendix Air Brake Training

— **AND NEW IN 2019** —

Advanced Technology Training

2019 Bendix Training Classes

We're proud to announce the roll out of the new **Bendix® Advanced Technology Training** (2-day) class... an exciting new addition to the Bendix training schedule which also includes the tried-and-true **Bendix® Air Brake Training** (3-day) class. Both classes are conducted by Bendix' veteran ASE-certified training team.

The Air Brake Training class is tailored to new & experienced technicians.

The curriculum includes the fundamentals of compressed air; tactics for air system failure mode diagnosis and troubleshooting; and air brake system and foundation brake components, including air compressors, valves, foundation drum brakes and air disc brakes. This all-inclusive course incorporates description, operation, and service elements for the total range of components within dual air brake systems. *Note that Bendix recommends that each student complete the online air brake training on brake-school.com before taking this in-person Air Brake Training (3-day class)*.*

The **NEW** Advanced Technology Training class picks up where the Air Brake Training ends*.

This class covers the operation and troubleshooting of advanced safety systems and software. Topics include Antilock Braking Systems (ABS), the Bendix® ESP® full stability system, Bendix® Wingman® Advanced™ – a Collision Mitigation technology, AutoVue® – lane departure warning system, SafetyDirect® – a web-based vehicle monitoring system, our flagship Bendix® Wingman® Fusion™ driver assistance system, the SmarTire® and SmarTire Trailer-Link™ Tire Pressure Monitoring Systems (TPMS), and more. Class time includes in-depth, hands-on maintenance for Bendix® air disc brakes and electrical diagnostics. *The increase in technological advances in braking and stability makes this a training must for the advanced technician.*

*Due to the quantity and complexity of the products covered, Bendix highly recommends that each student complete the Bendix Air Brake Training (3-day) class, or at minimum, the online brake school at brake-school.com, before taking the Advanced Technology Training class. Both classes include classroom lectures and practical hands-on exercises, plus visual aids to demonstrate the components and related systems. Most locations feature operational demonstration boards.

2019 Bendix Training Schedule

	State	City	Date <i>All Training Classes are 8:00 a.m. to 4:00 p.m.</i>	Class Code
Air Brake Training (3-Day) Tuesday – Thursday
